Mr. Bruce E. Johnson
Department of Ecology
Industrial Section
Olympia WA 98504

Mr. Johnson:

X As per agreements made at our April 15, 1982 meeting, I am sending an ash clarifier schematic flow diagram and EP toxicity data for the hog fuel boiler slag. The ash clarifier diagram indicates flows, and a simple mass balance at a tire burning rate of approximately 16 tons per day. The EP toxicity data is for the sample collected with you on April 22, 1982.

Sincerely,

Sam Archer
